LED Light Sheet
Applelec

Manufactured in the UK, Applelec's LED Light Sheet is a versatile backlighting unit that delivers bright, even illumination suitable for a variety of applications. Featuring a slim profile of 6mm or 8mm, the LED light panels can be employed within retail display systems, used to create a dramatic wall of light, or even to illuminate surface materials such as decorative glass and graphics. The premium panels can be used in a diverse range of internal and external applications, giving you the opportunity to create truly stunning lighting schemes.

Ultima
LED Linear

The concept behind Ultima was to design a luminaire that perfectly blends into any architectural concept with minimal structural impact. The use of nano-structured optics reduces the overall footprint into a 10x13mm form factor. It features seven crisp lighting distributions from spot to asymmetric. A high level of integration in any building structure offers tremendous lighting freedom while reducing the consumption of raw materials to a minimum. The anti-glare louvre contributes to make it disappear from sight by concealing the light source and directing the light where it is intended.

Nest
Landa

Nest is a willow weave made by hand and subjected to a nanoparticle paint treatment for maximum resistance to atmospheric agents. Designed to be placed in the grooves of trees, with 8W LED light source, it emits a full beam of light upwards with a colour temperature of 3000K. Opal screen for diffused light, Nest is available in Ø17cm and Ø23.5cm; an IP65 protection degree that makes it ideal for outdoor applications.

Orma Range
Linea Light Group

Orma_Concentrica includes the Concentrica_R models, for refined aesthetics with two concentric luminous rings that act as a path-marker. Orma_Micro adds a new dimension and completes the range: with a diameter of just 2cm, it represents the perfect solution for anyone looking for an uplight with path-marker function and minimum bulk. Orma_Glass adds a touch of elegance, concealing the flange and covering the top with a transparent glass diffuser that makes up a dedicated optics compartment and aesthetically redefines the product.

Jade Colour Flow & Tunable White
CLS

The CLS Jade Colour Flow & Tunable White is a unique lighting concept using innovative new LED modules. Suitable for numerous applications, from thematic environments in museums and showrooms to shops and other locations where functional lighting can be combined with coloured lighting in order to change the ambiance. Available in many variants, with a unique control range such as Wireless DMX and Casambi for the most demanding projects.

45 3sixty
Specialty Lighting Industries

Starting as a small aperture downlight, the 45 3sixty fully retracts from the ceiling, transforming into a pendant or continues its journey to become a mono-point spot capable of 360° of rotation and +/-45° of tilt. It is equipped with wireless motor control, dynamic beam shaping from 10° to 50° and full color RGBW and Tunable White technology. All controlled from a single mobile app.
